MILESTONE-1

Team Members:	Skills:
1)Havi Bohra (210429)	People Person, Content Writing
2)Sourav Sharma (211055)	Design, Data Analysis
3)Tanmey Agarwal (211098)	People Person, Design
4)Tejus Khandelwal (211111)	Data Analysis

Introduction:

Our topic for the project is **Slack** application. Slack is a popular team communication platform that facilitates real-time messaging, file sharing, and collaboration among team members. It offers channels for organized discussions, integrations with various tools and services, and customizable notifications to streamline workflow efficiency.

- Drashti Modi 210365
- Utkarsh Agarnwal 211127
- Khush Khandelwal 210511

Feedback Given to.

- Hani Bohra 210429
- Sevan Sharma 211035
- Tanmay Agarnwal 211098
- Tejus Khandelwal 211111

Team Members

- An individual with 'marketing' skills is missing. Please reassign skills in an efficient manner.

Platform Choice -

- Given the large user base and facilities, this can be a very impactful project.

Data Gathering -

- The recent update of the application is only 1 week old (11th March 2024); with limited detailed reviews past that. Most of the reviews recently are on extreme ends with little detailing on Google Play Store.

- The reviews presented in the sources are very diverse given the number of features in the application. This would make categorization difficult and would require large amount of data to be processed to get useful content.

- Most of the websites have high rating for the app so it would be difficult to get data.

Feedback Taken:

1. The recent update does address certain issues, but there are still remaining ones to tackle.
2. We have added additional links with detailed problem reviews.
3. We'll employ techniques like card sorting to categorize feedback and strategize accordingly.
4. Platforms like G2 allow us to gather reviews from lower ratings using filters, aiding us in pinpointing specific areas needing improvement.
